

■ ■ PRESS RELEASE, Rennes, the 31<sup>st</sup> of January 2008.

## MOBILE WORLD CONGRESS 2008 Barcelona, 11-14 February 2008

During the forthcoming Mobile World Congress event, **Siradel** will present innovative solutions for 3G, Wimax and Broadcast radio network planning, including :

- The 2.8 release of the **Volcano software**, the world leading suite of propagation models, compatible with major network planning tools
- A unique 2D and 3D map data offer available for more than 100 countries, with unique characters for radio planning and now ready for other new applications, e.g. LBS
- Radio expertise for network design and optimization for any indoor and outdoor wireless network

It will be our pleasure to welcome you at our booth, #2F49 **in Hall 2** !

Looking forward to hearing from you,
