

TD TECH and Siradel sign an OEM agreement to use Volcano for TD-SCDMA network design

■ ■ **PRESS RELEASE**, Hong Kong, the 4th of December 2006

Siradel is pleased to announce the signature of an OEM agreement with TD TECH, for the use and distribution of the **Volcano** software as an integral part of **TD TECH's** radio planning solution TPlan, for the design of TD-SCDMA networks in China.

"We are pleased to sign an OEM agreement with **TD Tech**, one of the major equipment vendors in China, and contribute to their TD-SCDMA network design. By using the **Volcano** technology, radio engineers can calculate accurate radio coverage and improve the level of confidence in their predicted 3G network capacity", said Laurent BOUILLLOT, CEO of **SIRADEL**.

"**TD Tech** is looking forward to this partnership in TD-SCDMA radio network planning. Recently **TD Tech** has released its first commercial version of its TD-SCDMA network planning software TPlan. Volcano will be integrated part of TPlan and will enable **TD Tech** to offer the best-in-class solution for TD-SCDMA radio network design", said Mr. Klaus MALER, CEO of **TD TECH**.

■ ■ About **SIRADEL** - www.siradel.com

SIRADEL have a global footprint for the supply of turn-key solutions to design and optimize the infrastructure of sophisticated systems such as 3G mobile, WiMAX or Digital Video Broadcasting networks. **SIRADEL** have an unrivalled radio-wave propagation expertise asset, backed by a strong R&D policy revolving around propagation models, geographical specifications, indoor/outdoor radio design, radio measurement processes and propagation model tuning.

SIRADEL's solutions include :

- The **Volcano** software, a suite of leading-edge propagation models
- A global offer for 3D map data
- Radio expertise focused on radio coverage and quality of service

With a total independence from the industry and a strong financial backing its shareholder, **SIRADEL's** products and services are currently used in more than 50 countries.

■ ■ About **TD-TECH** – www.td-tech.com

TD Tech Ltd. is a joint venture between Siemens Communications Group and Huawei Technologies Ltd. It was inaugurated in Beijing on March 18, 2005. It focuses on the research & development, manufacturing, and sales & marketing of TD-SCDMA technology and products. **TD Tech** aims to develop TD-SCDMA technology into a commercial success in China, and then in the world.

TD Tech has been taking lead in the development of TD-SCDMA industry based on the solid technical foundation laid by its mother companies since 1998 , **TD Tech** is the first to launch whole series of commercial RAN equipment in the TD-SCDMA industry. Currently, **TD Tech** has around 700 employees, with its senior management and core team coming from both parent companies
